

Graham Chisholm
Director, President & CEO

Nubian Resources Ltd is a Junior Mineral Resource Exploration Company whose objective is to create value for our shareholders by discovering and developing mineral resources, which can be profitably exploited.

Nubian Resources Ltd is listed on the TSX Venture Exchange, (TSX.V: NBR) and is focused on Gold, Copper and Cobalt.

The company's prime focus is on precious metal with a resource potential of 2-3 Mio Au of gold equivalent and to find JV partners to develop it's African properties.

Excelsior Springs (Nevada)

Nubian's primary precious metal asset is the Excelsior Springs gold property in Nevada, USA. The company has recently completed a NI- 43-101 report on the property which concluded "based on the results of previous drilling programs, the Excelsior Springs property should be considered an advanced-stage exploration project having significant potential to host one or more open-pittable gold deposits."

The objective is to create a minimum "inferred + indicated" resource of 1 million Oz Gold of which 0.5million Oz will be classified in the "indicated" category over the next 3 years.

The Excelsior Springs Gold Prospect is located in west-central Esmeralda County, Nevada and lies within the Walker Lane, a zone of regional-scale, northwest-trending, strike-slip faulting, which hosts a significant number of precious metal deposits and is approximately 50 miles WSW of the Goldfield District, with past production of +10 million ounces gold. The Tonopah District, with a past production of 2 million ounces gold and 100 million ounces silver, lies approximately 65 miles to the northeast. The Buster mine, the main past producing mine located on the patented claims, has past production estimated at 18,000 tons at 1.2 opt gold. The workings are still accessible through the Buster Shaft which is 235 ft. deep.

Several exploration companies have conducted drilling programs on the property, and the results have begun to define an extensive zone of gold mineralization. Drilling around the Buster and Upper shafts has outlined the Buster mineralized zone approximately 1,000 feet-long and 200 feet-wide.

DRC/Zambia

Nubian has base metal assets located in Zambia and DRC along Africa's Copper-belt which is host to many base metal companies.

Luapula Minerals [Zambia] - The company owns 49% of a 1000 hectare property in Northern Zambia and has the option to acquire up to 100% of the property.

Bayombwe - Large land position in DRC (PR 7248) covering 3,100 Km² located 110km NW of famous Tenke deposit.

Initial surface sampling indicates wide range of mineralization including copper, cobalt, colombo tantalite, nickel, vanadium, cassiterite, tin.

Nubian has an option to acquire a 73.5% equity position in this property.

Skania - Nubian owns 77% of "Skania gold" two concessions (PR 599 and PR 600) covering 60sq kms.

Directors:

Markus Janser, M.Com - Lead Director

Mr. Janser graduated with a MCom from University of Fribourg in Switzerland in 1994. He worked for Swiss Banking Group UBS in London, Zurich and Johannesburg in Private Banking and Asset Management and was part of the Project and Implementation Team for UBS merger with SBC. In 2000 Markus formed his own Asset Management Company based in Switzerland and Johannesburg. He retired from the Company in 2007 and has since been consulting to a Private Investor group focused on junior mining and exploration and to an international retail group.

Graham Chisholm A.C.I.S. – Director, President and CEO

Graham is an Associate of the Chartered Institute of Secretaries and Administrators (Canada) and has over 30 years experience in executive management. Mr. Chisholm's unique blend of skills includes experience in corporate governance, equity finance, entrepreneurial flair and metallurgical and electrowinning experience using EMEW.

Larry Treadgold C.Eng, FIMMM, Technical Director

Mr. Treadgold has over 40 years' experience as an extractive metallurgist and manager in gold, silver, copper & cobalt assets world wide. He has developed both green-field and brown-field sites and brought them to optimum capacity and profitability.

He has worked on the Zambian Copper-belt with Ndola Copper Refineries, and with Noranda Minerals Inc., responsible for operations in United States and Asia.

In 2005, Mr. Treadgold assumed the responsibility of Director of Metallurgy with BSG Resources responsible for the Luanshya and Chambeshi operations in Zambia and the development of KOV, at the time the largest copper and cobalt asset in the DRC. Mr. Treadgold was a key member of the Executive team that successfully took this DRC asset to the market in 2007 with the flotation of Nikanor on the AIM exchange which raised £400m.

David Fynn CA – CFO and Director

David is a Chartered Accountant and since 1996 has been the principal of D.A. Fynn & Associates Inc., an accounting firm. Prior to 1996, Mr. Fynn worked as a senior manager with KPMG in Canada and Ernst & Young in the United Kingdom and Saudi Arabia.

Jeannette Durand is Corporate Secretary of Nubian and Geologist Ken Brook, B.Sc, M.Sc, RPG (QP) and Engineer Tom Kennedy, B.Sc, M.Sc(Eng), CIMM act as consultants to the company.

Investor Highlights:

- Low issued share capital – 7.2 million shares
- \$1.5 million in Treasury/Investments
- 100% of Advanced gold property in Nevada USA
- Large Copper/Cobalt properties in DRC
- Copper property in Zambia
- Strong Technical team
- Experienced Board of Directors
